EDUCATION

State University of New York at Buffalo **August 2022 – May 2026**
Bachelor of Science, Computer Science | GPA: 3.54

SKILLS & TOOLS

Languages: Java, Python, TypeScript, Visual Basic, C, Blueprint (Unreal Engine)
Data Management & Analytics: MSSQL, PostgreSQL
Web Development: JavaScript, React, FoalTS
DevOps & Tools: Git, Docker, Linux, VS Code

PROJECTS

Customer Atlas – React, Python, PostgreSQL, Copilot, Mapbox

- A market intelligence platform designed to visualize global customer engagement, currently in use by the University at Buffalo to analyze market fit for its AI-driven products (SATE, AudioSight, mRehab)
- Architected the complete backend on Supabase to ingest and process geographically-distributed user data
- Integrated generative AI via OpenRouter to perform trend identification using Copilot
- Developed an interactive dashboard with React to dynamically render data on a global map

Scheduling Algorithm – Python

- A Python-based shift scheduling engine designed to optimize fairness and coverage
- Automated a complex scheduling process for a 18-person team, reducing manual planning time from 4 hours to seconds and eliminating human error in shift assignments
- Modeled a real-world scheduling system as a data-driven algorithm, successfully balancing 100% shift coverage with constraints on worker preferences and fairness

StringsAttached.online – React, JavaScript, FoalTS, REST

- A full-stack social and dating platform built for musicians, designed to help them connect, collaborate, and find partners based on musical interests
- Spearheaded the development of the entire front-end application, building a responsive UI from concept to deployment
- Implemented critical, full-stack features including a secure JWT authentication system and a real-time chat

EXPERIENCE

State University of New York at Buffalo - Research Assistant **August 2025 – December 2025**

- Engineered Customer Atlas, a full-stack application using React and PostgreSQL to streamline data collection processes, collaborating within a 4-person team under the supervision of Professor Wenyao Xu.
- Deployed the solution for institutional use at the University at Buffalo, enabling the active tracking of customer interest metrics and the projection of potential revenue.

International Admissions Ambassador - GloBull Leader **March 2023 - Present**

- Developed a Python scheduling algorithm to automate and optimize shift assignments for a team of 18 ambassadors
- Directed content strategy and community management for UB International Admissions social media platforms, engaging thousands of prospective students globally

STEM Exploration Field Trips Volunteer **January 2024**

- Gamified complex scientific topics into engaging mini-games to spark curiosity and promote STEM accessibility for elementary school students

AWARDS & ACHIEVEMENTS

Dean's List 2022, 2023: Recognized for achieving more than 3.6 GPA across three separate semesters
Grace W. Capen Academic Award 2024: Awarded for outstanding, long-term academic performance, maintaining a cumulative GPA above 3.95
UB CSE Demo Day 2025: Awarded 2nd Place in the department-wide CSE Demo Day, selected from a competitive pool of 30+ teams across multiple capstone courses
